23rd February 2022

Dear Parent/Carer

Re: COVID-19

Following the latest Government guidance on Monday 21st February I am able to confirm some of the changes which will happen from this.

These are:

- From 21st February twice weekly asymptomatic testing ends for staff and students.
- From 24th February until 1st April following a positive result the advice is to stay at home and avoid contact with others for at least 5 days. Then continue to follow the previous guidance of LFD testing from day 5 until you have received two negative results on consecutive days, or until you have completed 10 days.
- With regard to face coverings in communal areas masks do not need to be worn, however if you still wish to wear a mask they need to be worn in the correct manner.

There will be more guidance from the Government and the Local Authority from 24th February, once we have been informed of any future changes I will be in contact again.

Thank you for your continued support.

Yours sincerely

Helen Colbran
